## EB09063 - Goat Anti-AGXT / AGT Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** AGXT, alanine-glyoxylate aminotransferase, AGT, AGT1, AGXT1, PH1, SPAT, SPT, TLH6, L-alanine: glyoxylate aminotransferase 1, hepatic peroxisomal alanine:glyoxylate aminotransferase, serine-pyruvate aminotransferase, serine:pyruvate aminotransferase

**Official Symbol:** AGXT

**Accession Number(s):** NP\_000021.1

**Human GeneID(s):** [189](#)

### Immunogen

Peptide with sequence C-DKAKKKMYSRK, from the internal region of the protein sequence according to NP\_000021.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:2000.

**Western blot:** Preliminary experiments gave a faint 37kDa band in Human Liver lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 43.0kDa according to NP\_000021.1. The 37kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human
