EB08772 - Goat Anti-APOLD1 / VERGE Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: APOLD1, apolipoprotein L domain containing 1, DKFZP434F0318, FLJ25138, VERGE

Official Symbol: APOLD1

Accession Number(s): NP_110444.1

Human GeneID(s): [81575](#)

Immunogen

Peptide with sequence C-KSSRGHDLKISADQ, from the C Terminus of the protein sequence according to NP_110444.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:2000.

Western blot: Preliminary experiments gave an approx. 37kDa band in Human Brain (Frontal Cortex) lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 27.2kDa according to NP_110444.1 The 37kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human
