EB05375 - Goat Anti-ARHU / WRCH1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: RHOU, ras homolog gene family, member U, ARHU, WRCH1, hG28K, WRCH-1, CDC42L1, FLJ10616, DJ646B12.2, fJ646B12.2, 2310026M05Rik, ras homolog gene family, member U, Ryu GTPase, CDC42-like GTPase, GTP-binding protein like 1, Wnt-1 responsive Cdc42 homolog, FLJ10616, WRCH1, GTP-binding protein SB128,

GTP-binding protein like 1, ras-like gene family member U

Official Symbol: RHOU

Accession Number(s): NP_067028.1

Human GeneID(s): 58480

Immunogen

Peptide with sequence PPQQGDPAFPDRCEA, from the N Terminus of the protein sequence according to NP_067028.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx. 22kDa band in lysates of cell lines A431, HeLa and HEK293 after 0.3μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 28.2kDa according to NP_067028.1. The 22kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human
