## EB07634 - Goat Anti-ATAD5 / FRAG1 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** ATAD5, C17orf41, chromosome 17 open reading frame 41, FLJ12735, FRAG1, chromosome fragility associated gene 1, ATPase family, AAA domain containing 5

**Official Symbol:** ATAD5

**Accession Number(s):** NP\_079133.3

**Human GeneID(s):** [79915](#)

### Immunogen

Peptide with sequence C-DNKIYPKNTKKRVD, from the internal region of the protein sequence according to NP\_079133.3.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:32000.

**Western blot:** Preliminary experiments gave an approx 50kDa band in lysates of all Human cell lines tested after 0.03µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 208kDa according to NP\_079133.3. The 50kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human
