## EB08112 - Goat Anti-BAG5 (internal) Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** BAG5, BCL2-associated athanogene 5, BAG-5, BAG-family molecular chaperone regulator-5

**Official Symbol:** BAG5

**Accession Number(s):** NP\_001015048.1; NP\_001015049.1; NP\_004864.1

**Human GeneID(s):** [9529](#)

**Non-Human GeneID(s):** 70369 (mouse), 366734 (rat)

**Important Comments:** This antibody is expected to recognise reported isoforms a (NP\_001015049.1) and b (NP\_001015048.1, NP\_004864.1).

### Immunogen

Peptide with sequence C-DGNRTDKNYIR, from the internal region of the protein sequence according to NP\_001015048.1; NP\_001015049.1; NP\_004864.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:16000.

**Western blot:** Preliminary experiments in Human Brain (Cerebellum, Hippocampus and Substantia nigra) lysates gave no specific signal but low background (at antibody concentration up to 1µg/ml). We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat
