# EB08147 - Goat Anti-COL4A3BP (aa662-672) Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

**Principal Names:** COL4A3BP, collagen, type IV, alpha 3 (Goodpasture antigen) binding protein, CERT, CERTL, FLJ20597, GPBP, STARD11, Goodpasture antigen-binding protein, START domain containing 11, alpha 3 type IV collagen binding protein, ceramide transporter

Official Symbol: COL4A3BP

Accession Number(s): NP\_005704.1; NP\_112729.1

Human GeneID(s): 10087

Non-Human GenelD(s): 68018 (mouse)

Important Comments: This antibody is expected to recognise both reported isoforms

(NP\_005704.1 and NP\_112729.1)

#### **Immunogen**

Peptide with sequence DHDSAPLNNRC, from the internal region of the protein sequence according to NP\_005704.1; NP\_112729.1 .

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

#### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

Western blot: Approx 60kDa band observed in mouse heart lysates (calculated MW of 71.1kDa according to mouse NP\_075909.1 and 60.0kDa according to human NP\_112729.1). Recommended concentration: 0.5-1.5µg/ml. An additional band of unknown identity was also consistently observed at 26kDa. This band was successfully blocked by incubation with the immunising peptide. We would appreciate any feedback from people in the field - have any such results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

## **Species Reactivity**

Tested: Mouse

Expected from sequence similarity: Human, Mouse

EB08147 ( $0.5\mu g/ml$ ) staining of mouse heart lysate ( $35\mu g$  protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
