# EB08945 - Goat Anti-Dpm2 (mouse) Antibody

RP23-255P20.5, AW557993, R75484, OTTMUSP00000012854

Size: 100µg specific antibody in 200µl

# **Target Protein**

Principal Names: Dpm2, dolichol-phosphate (beta-D) mannosyltransferase 2,

Official Symbol: Dpm2

Accession Number(s): NP\_034203.1 Non-Human GeneID(s): 13481 (mouse)

## **Immunogen**

Peptide with sequence C-YVMLKSQKITKKAQ, from the C Terminus of the protein sequence according to NP\_034203.1.

Please note the peptide is available for sale.

# **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx. 25kDa band in Mouse Eye lysates after 0.02μg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 9.4kDa according to NP\_034203.1. The 25kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

#### **Species Reactivity**

Tested:

Expected from sequence similarity: Mouse
