EB07742 - Goat Anti-FABP2 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: FABP2, fatty acid binding protein 2, intestinal, FABPI, I-FABP, MGC133132, Fatty acid-binding protein, intestinal, intestinal fatty acid binding protein 2,

fatty acid-binding protein 2, intestinal-type fatty acid-binding protein

Official Symbol: FABP2

Accession Number(s): NP_000125.2

Human GeneID(s): 2169

Non-Human GenelD(s): 14079 (mouse)

Immunogen

Peptide with sequence C-EGVEAKRIFKKD, from the C Terminus of the protein sequence according to NP_000125.2.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: A very strong approx 16kDa band observed in Human Duodenum lysates (calculated MW of 15.2kDa according to NP_000125.2). In transfected HEK293 transiently expressing FABP2 a band of approx 18kDa is observed. This band is not observed in the non-transfected HEK293. Recommended concentration: 0.001µg/ml.

IHC: In paraffin embedded Human Small Intestine shows strong staining of basement membrane and weaker staining of enterocytes. Recommended concentration: 2-3µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Mouse, Rat, Dog, Pig, Cow

EB07742 (0.001µg/ml) staining of Human Duodenum lysate (35µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

HEK293 overexpressing FABP2 (RC210206) and probed with EB07742 (mock transfection in first lane), tested by Origene.

EB07742 (2.5μg/ml) staining of paraffin embedded Human Small Intestine. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
