EB08625 - Goat Anti-FPRL1 (aa13-26) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: FPRL1, formyl peptide receptor-like 1, ALXR, FMLP-R-II, FMLPX, FPR2A, FPRH1, FPRH2, HM63, LXA4R, lipoxin A4 receptor (formyl peptide receptor

related'

Official Symbol: FPRL1

Accession Number(s): NP_001453.1

Human GeneID(s): 2358

Important Comments: Reported variants represent identical protein: NP_001005738.1

and NP_001453.1.

Immunogen

Peptide with sequence EEVSYESAGYTVLR-C, from the N Terminus of the protein sequence according to NP_001453.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: Preliminary experiments gave an approx. 49kDa band in Human Peripheral Blood Mononucleocytes, and Cell line U93I7 lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 39.0kDa according to NP_001453.1. The 49kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human
