EB07361 - Goat Anti-FXR1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: FXR1, fragile X mental retardation, autosomal homolog 1, fragile X

mental retardation-related protein 1

Official Symbol: FXR1

Accession Number(s): NP_005078.2; NP_001013456.1; NP_001013457.1

Human GeneID(s): 8087

Non-Human GenelD(s): 14359 (mouse), 361927 (rat)

Important Comments: This antibody is expected to recognise all reported isoforms

(NP_005078.2, NP_001013456.1 and NP_001013457.1).

Immunogen

Peptide with sequence C-RIEGDNENKLPRED, from the internal region of the protein sequence according to NP_005078.2; NP_001013456.1; NP_001013457.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:128000.

Western blot: Approx 75+80kDa band observed in lysates of cell line NIH-3T3 (calculated MW of 59.9kDa according to NP_001013457.1). The observed molecular weight corresponds to earlier findings in literature (Khandjian et al Hum Mol Genet. 1998 Dec;7(13):2121-8.; PMID: 9817930). An additional band of unknown identity was also consistently observed at 37kDa. This band was successfully blocked by incubation with the immunizing peptide. Recommended concentration. 1-3μg/ml. Primary incubation 1 hour at room temperature.

Species Reactivity

Tested: Mouse

Expected from sequence similarity: Human, Mouse, Rat, Dog, Cow

EB07361 (1μg/ml) staining of NIH-3T3 cell lysate (35μg protein in RIPA buffer). Detected by chemiluminescence.
