## EB07318 - Goat Anti-GPX6 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** GPX6, glutathione peroxidase 6 (olfactory), HGNC:4558, glutathione peroxidase 6

**Official Symbol:** GPX6

**Accession Number(s):** NP\_874360.1

**Human GeneID(s):** [257202](#)

### Immunogen

Peptide with sequence QTLKPQNRKVDC, from the internal region of the protein sequence according to NP\_874360.1.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:64000.

**Western blot:** Preliminary experiments gave an approx 37kDa band in lysates of cell lines HepG2 and HeLa after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 24.9kDa according to NP\_874360.1. The 37kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human
