EB07111 - Goat Anti-IL6R / CD126 (isoform 1) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: IL6R, interleukin 6 receptor, HGNC:6019, CD126, IL-6R-1, IL-6R-alpha, IL6RA, MGC104991, CD126 antigen, interleukin 6 receptor alpha subunit

Official Symbol: IL6R

Accession Number(s): NP_000556.1

Human GeneID(s): [3570](#)

Important Comments: This antibody is expected to recognise isoform 1 only (NP_000556.1)

Immunogen

Peptide with sequence C-DNTSSHNRPDARD, from the internal region of the protein sequence according to NP_000556.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:8000.

Western blot: Preliminary experiments gave an approx 26-28kDa band in Human Bone Marrow and Tonsil lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 51.5kDa according to NP_000556.1. The 26-28kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human
