## EB10987 - Goat Anti-MED12 (aa1981-1994) Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** MED12, mediator complex subunit 12, ARC240, CAGH45, FGS1, HOPA, KIAA0192, OKS, OPA1, TRAP230, CAG repeat protein 45, OPA-containing protein, OTTHUMP00000023490, OTTHUMP00000023493, activator-recruited cofactor 240 kDa component, human opposite pai

**Official Symbol:** MED12

**Accession Number(s):** NP\_005111.2

**Human GeneID(s):** [9968](#)

**Non-Human GeneID(s):** 59024 (mouse), 679693 (rat)

### Immunogen

Peptide with sequence C-NPTLVDPTRHLQQR, from the internal region (near C Terminus) of the protein sequence according to NP\_005111.2.

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:32000.

**Western blot:** Preliminary experiments gave an approx 70kDa band in Human Brain (Olfactory Bulb) and Rat Brain lysates after 0.5µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 243kDa according to NP\_005111.2. The 70kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat, Dog, Pig, Cow
