# EB08500 - Goat Anti-NMNAT3 Antibody

Size: 100µg specific antibody in 200µl

## **Target Protein**

Principal Names: NMNAT3, nicotinamide nucleotide adenylyltransferase 3, PNAT-3, PNAT3, pyridine nucleotide adenylyltransferase 3 Official Symbol: NMNAT3 Accession Number(s): NP\_835471.1 Human GeneID(s): <u>349565</u>

#### Immunogen

Peptide with sequence C-GSTWKGKSTQSTE, from the C Terminus of the protein sequence according to NP\_835471.1.

Please note the peptide is available for sale.

## **Purification and Storage**

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

## **Applications Tested**

Peptide ELISA: antibody detection limit dilution 1:32000.

**Western blot:** Preliminary experiments gave an approx 48kDa band in Human Brain (Cerebral Cortex, Frontal Cortex, Hippocampus) lysates after 0.3µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 24.1kDa according to NP\_835471.1. The 48kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### **Species Reactivity**

Tested:

Expected from sequence similarity: Human
