EB10786 - Goat Anti-NOTCH4 (aa1261-1273) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NOTCH4, DAQB-143M3.4, FLJ16302, INT3, MGC74442, NOTCH3, Notch homolog 4, neurogenic locus notch homolog protein 4

Official Symbol: NOTCH4

Accession Number(s): NP_004548.3

Human GeneID(s): [4855](#)

Non-Human GeneID(s): 18132 (mouse), 406162 (rat)

Important Comments: The immunizing peptide represents part of the extracellular domain.

Immunogen

Peptide with sequence DHFHNGHCEKGCNN, from the internal region of the protein sequence according to NP_004548.3.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:8000.

Western blot: Preliminary experiments gave an approx 27kDa band in all human, mouse and rat tissue and cell line lysates tested after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 210kDa according to NP_004548.3. The 27kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Pig, Cow
