EB10761 - Goat Anti-PRDM14 (aa414-427) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: PRDM14, PR domain containing 14, MGC59730, PFM11, PR domain zinc finger protein 14, PR domain-containing protein 14, PR-domain zinc finger protein 14

Official Symbol: PRDM14

Accession Number(s): NP_078780.1

Human GeneID(s): [63978](#)

Non-Human GeneID(s): 383491 (mouse), 100365184 (rat)

Immunogen

Peptide with sequence YRDKHLKYTPCVDK, from the internal region of the protein sequence according to NP_078780.1.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx 40kDa band in Human, Mouse and Rat Testis lysates after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 64.1kDa according to NP_078780.1. The 40kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested:

Expected from sequence similarity: Human, Mouse, Rat, Dog, Pig, Cow
