## EB08108 - Goat Anti-PTBP2 Antibody

Size: 100µg specific antibody in 200µl

### Target Protein

**Principal Names:** PTBP2, polypyrimidine tract binding protein 2, FLJ34897, MIBP, PTB, PTBLP, brPTB, nPTB, nPTB5, nPTB6, nPTB7, nPTB8, PTB-like, neural polypyrimidine tract binding protein, splicing regulator

**Official Symbol:** PTBP2

**Accession Number(s):** NP\_067013.1

**Human GeneID(s):** [58155](#)

**Non-Human GeneID(s):** 56195 (mouse), 310820 (rat)

### Immunogen

Peptide with sequence C-SKKFKGEDKMD, from the internal region of the protein sequence according to NP\_067013.1 .

Please note the [peptide](#) is available for sale.

### Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

### Applications Tested

**Peptide ELISA:** antibody detection limit dilution 1:1000.

**Western blot:** Preliminary experiments gave an approx 35kDa band in lysates of cell line NIH3T3 after 0.1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 57.5kDa according to NP\_067013.1. The 35kDa band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

### Species Reactivity

**Tested:**

**Expected from sequence similarity:** Human, Mouse, Rat
