EB08972 - Goat Anti-SCNN1G Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: SCNN1G, sodium channel, nonvoltage-gated 1, gamma, ENaCg, ENaCgamma, PHA1, SCNEG, ENaC gamma subunit, amiloride-sensitive epithelial sodium channel gamma subunit

Official Symbol: SCNN1G

Accession Number(s): NP_001030.2

Human GeneID(s): [6340](#)

Immunogen

Peptide with sequence C-SNQLTDTQMLDE, from the C Terminus of the protein sequence according to NP_001030.2.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx 140kDa band in Human Breast cancer and Colon lysates after 1µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 74.3kDa according to NP_001030.2. The 140kDa band was successfully blocked by incubation with the immunizing peptide.

IHC: Paraffin embedded Human Colon. Recommended concentration: 4µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB08972 (4µg/ml) staining of paraffin embedded Human Colon. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
