EB09191 - Goat Anti-SLC47A1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: SLC47A1, solute carrier family 47, member 1, FLJ10847, MATE1,

MGC64822, multidrug and toxin extrusion 1

Official Symbol: SLC47A1

Accession Number(s): NP_060712.2

Human GeneID(s): 55244

Immunogen

Peptide with sequence C-PEHPQDGAKLSRKQ, from the internal region (near C

Terminus) of the protein sequence according to NP_060712.2.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

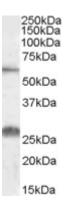

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: Approx. 60kDa band observed in Human Kidney lysates (calculated MW of 61.9kDa according to NP_060712.2). Recommended concentration: 0.1-0.3μg/ml. An additional band of unknown identity was also consistently observed at 26kDa. This band was successfully blocked by incubation with the immunizing peptide. We would appreciate any feedback from people in the field - have any such results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported?

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB09191 (0.1 μ g/ml) staining of Human Kidney lysate (35 μ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
