EB08667 - Goat Anti-USP43 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: USP43, ubiquitin specific peptidase 43, FLJ30626, ubiquitin specific protease 43

Official Symbol: USP43

Accession Number(s): NP_694942.3

Human GeneID(s): [124739](#)

Immunogen

Peptide with sequence C-SQRTVPGEQASYGT, from the internal region of the protein sequence according to NP_694942.3.

Please note the [peptide](#) is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: Preliminary experiments gave an approx 170kDa band in Human Testis lysates after 0.2µg/ml antibody staining. Please note that currently we cannot find an explanation in the literature for the band we observe given the calculated size of 123kDa according to NP_694942.3. The 170kDa band was successfully blocked by incubation with the immunizing peptide.

IHC: Paraffin embedded Human Kidney. Recommended concentration: 5-10µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human

EB08667 (5µg/ml) staining of paraffin embedded Human Kidney. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
