EB09963 - Goat Anti-WFDC2 (aa29-43) Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: dJ461P17.6, EDDM4, epididymal protein 4, epididymal secretory protein E4, epididymis-specific, whey-acidic protein type, four-disulfide core, HE4, major epididy, MGC57529, WAP domain containing protein HE4-V4, WAP four-disulfide core domain 2, WAP5, WFDC2 Official Symbol: WFDC2 Accession Number(s): NP_006094.3 Human GeneID(s): <u>10406</u>

Immunogen

Peptide with sequence GAEKTGVCPELQADQ, from the internal region of the protein sequence according to NP_006094.3.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide. Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin. Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:16000.

Western blot: In transfected HEK293 transiently expressing full-length Human WFDC2 (myc and DYKDDDDK tagged), a band of approx. 25kDa was observed. No bands were observed in mock-transfected HEK293 and the same band was observed using anti-myc tag antibody. Recommended concentration, 0.2-1µg/ml.

Species Reactivity

Tested: Human Expected from sequence similarity: Human, Dog

HEK293 lysate (10ug protein in RIPA buffer) overexpressing Human WFDC2 with C-terminal MYC tag probed with EB09963 (1ug/ml) in Lane A and probed with anti-MYC Tag (1/1000) in lane C. Mock-transfected HEK293 probed with EB09963 (1mg/ml) in Lane B. Primary incubations were for 1 hour. Detected by chemiluminescence.
