EB07440 - Goat Anti-XRCC4-like factor / NHEJ1 Antibody

Size: 100µg specific antibody in 200µl

Target Protein

Principal Names: NHEJ1, XRCC4-like factor, nonhomologous end-joining factor 1,

FLJ12610, XLF, Cernunnos **Official Symbol:** NHEJ1

Accession Number(s): NP_079058.1

Human GenelD(s): 79840

Immunogen

Peptide with sequence C-QRPQLSKVKRKKPR, from the C Terminus of the protein sequence according to NP_079058.1.

Please note the peptide is available for sale.

Purification and Storage

Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide.

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin.

Aliquot and store at -20°C. Minimize freezing and thawing.

Applications Tested

Peptide ELISA: antibody detection limit dilution 1:64000.

Western blot: Approx 38kDa band observed in lysates of Human Skin, Testis and Thyroid gland (calculated size of 33.3kDa according to NP_079058.1). The observed molecular weight corresponds to findings with antibodies from other sources. The 38kDa band was successfully blocked by incubation with the immunizing peptide. Recommended concentration 0.1-0.3µg/ml.

IHC: In paraffin embedded Human Placenta shows nuclear staining in trophoblasts. Recommended concentration, 2.5-3.8µg/ml.

Species Reactivity

Tested: Human

Expected from sequence similarity: Human, Dog

EB07440 (0.1 μ g/ml) staining of Human Thyroid lysate (35 μ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

EB07440 (3.8 μ g/ml) staining of paraffin embedded Human Placenta. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.
